Author enquiries

For enquiries relating to the submission of articles (including electronic submission where available) please visit Elsevier's Author Gateway at http://authors.elsevier.com. The Author Gateway also provides the facility to track accepted articles and set up e-mail alerts to inform you of when an article's status has changed, as well as detailed artwork guidelines, copyright information, frequently asked questions and more.

Contact details for questions arising after acceptance of an article, especially those relating to proofs, are provided after registration of an article for publication.

Publication information: *International Journal of Developmental Neuroscience* (ISSN 0736-5748). For 2005, volume 23 is scheduled for publication. Subscription prices are available upon request from the Publisher or from the Regional Sales Office nearest you or from this journal's website (http://www.elsevier.com/locate/ijdevneu). Further information is available on this journal and other Elsevier products through Elsevier's website: (http://www.elsevier.com). Subscriptions are accepted on a prepaid basis only and are entered on a calendar year basis. Issues are sent by standard mail (surface within Europe, air delivery outside Europe). Priority rates are available upon request. Claims for missing issues should be made within six months of the date of dispatch.

USA mailing notice: *International Journal of Developmental Neuroscience* (ISSN 0736-5748) is published *monthly except during January, March, July, September* by Elsevier Ltd. (P.O. Box 211, 1000 AE Amsterdam, The Netherlands). Annual subscription price in the USA US$ 1608 (valid in North, Central and South America), including air speed delivery. Periodical postage rate paid at Jamaica, NY 11431.
USA POSTMASTER: Send address changes to *International Journal of Developmental Neuroscience*, Publications Expediting Inc., 200 Meacham Avenue, Elmont, NY 11003.
AIRFREIGHT AND MAILING in the USA by Publications Expediting Inc., 200 Meacham Avenue, Elmont, NY 11003.

Whilst every effort is made by the publishers and editorial board to see that no inaccurate or misleading data, opinion or statement appear in this journal, they wish to make it clear that the data and opinions appearing in the articles and advertisements herein are the sole responsibility of the contributor or advertiser concerned. Accordingly, the publishers, the editorial board and editors and their respective employees, officers and agents accept no responsibility or liability whatsoever for the consequences of any such inaccurate or misleading data, opinion or statement.

Cover figure taken from A. Hari et al. "Neurotrophins and extracellular matrix molecules modulate sensory axon outgrowth". Fig. 1. Diagram of sensory skin innervation and formation of dermatomes. Here, the thoracic dermatomes demonstrate the segmentation and discernible borders that render this region suitable for study. Experiments involved DRGs taken from the thoracic region of the rat at E13.

Contents of Volume 22

Number 1

Regular papers

Z. Setkowicz, E. Bień and K. Janeczko 1 Contralateral response of macrophages and astrocytes to injury in the cerebral hemisphere of 6-day-old rat following prenatal gamma irradiation

C.S. Bavaresco, A.I. Zugno, B. Tagliari, C.M.D. Wannmacher, M. Wajner and A.T.S. Wyse 11 Inhibition of Na^+, K^+-ATPase activity in rat striatum by the metabolites accumulated in Lesch–Nyhan disease

A.K. Kondapi, N. Mulpuri, R.K. Mandraju, B. Sasikaran and K. Subba Rao 19 Analysis of age dependent changes of Topoisomerase II α and β in rat brain

C. Sinha, A.K. Agrawal, F. Islam, K. Seth, R.K. Chaturvedi, S. Shukla and P.K. Seth 31 Mosquito repellent (pyrethroid-based) induced dysfunction of blood–brain barrier permeability in developing brain

P.M. Whitington and H. Sink 39 Development of a polar morphology by identified embryonic motoneurons

B. Katbamna, A.M. Jelaso and C.F. Ide 47 Connexin 43 expression in glial cells of developing rhombomeres of *Xenopus laevis*

Corrigendum

R. Amodio, C. De Ruvo, A. Sacchetti, A. Di Santo, N. Martelli, V. Di Matteo, R. Lorenzet, A. Poggi, D. Rotilio, M. Cacchio and E. Esposito 57 Corrigendum to "Caffeic acid phenethyl ester blocks apoptosis induced by low potassium in cerebellar granule cells" [Int. J. Dev. Neurosci. 21 (2003) 379–389]
